Editorial Team

Editor in Chief

Marjan Mernik,

University of Maribor, Slovenia

Guest Editors

Davide Di Ruscio,

University of L'Aquila (Italy)

Juan De Lara,

Universidad Autónoma de Madrid (Spain)

Alfonso Pierantonio,

University of L'Aquila (Italy)

IMPORTANT DATES:

- **February 1st 2016:** Full paper submission deadline
- **July 1st 2016:** Submission deadline for revised papers
- **November 15th 2016:** Camera ready final manuscript

PAPER SUBMISSION:

The manuscripts along with all the required supplementary material should be submitted using Elsevier new submission platform EVISE.

https://www.evise.com/evise/faces/page/navigation/NavController.jspx?JRNL_ACR=COMLAN The authors should choose "SI: FlexMDE" when they reach the "Article Type" step of the submission process.

Computer Languages, Systems & Structures

Call for Papers:

Special issue on Flexible Model Driven Engineering

Topics of interest include, but are not limited to enhancing flexibility in some aspect of MDE:

- **Techniques for flexible meta-modelling and flexible typing**
 - Flexible metamodelling techniques: less static, more flexible
 - Model typing
 - Metamodelling by example, bottom-up metamodelling
 - Support for generic programming techniques in MDE
 - Dynamic typing techniques in MDE
 - Multilevel metamodelling
 - Typing inconsistency management
 - Partial typing, multiple typings
 - Constructive (top-down) and exploratory (bottom-up) modes for model typing
 - Metamodelling paradigms: multilevel, two-level, archetype-based, ...
- **Techniques for flexible modelling**
 - Model sketching
 - Model abstraction
 - Techniques for embedding domain specific languages in a combined language
 - Modelling using mobile devices
- **Flexible reutilization of MDE artefacts**
 - Reuse techniques for transformations and code generators.
 - Reuse techniques for models and metamodelling
 - Definition of reusable (meta-)model patterns and transformation patterns
 - Componentization techniques for MDE artefacts
- **Techniques for increasing the agility of the MDE process**
 - Experience reports regarding lack of flexibility in using modeling and MDE
 - Agility and MDE, agile modelling
 - Techniques for reducing the gap between modelling and programming

SUBMISSION GUIDELINES

The work submitted should not be previously published or submitted elsewhere for publication. In case the authors are extending a previous conference version, the submitted article should contain at least 30% new material. Also the authors are requested to attach the previous published conference version and explain the novelty of their extended version, submitted for journal publication. The authors should refer to "Guide for Authors" at <http://www.journals.elsevier.com/computer-languages-systems-and-structures/> to see the expected manuscript format. The manuscripts would be reviewed according to COMLAN reviewing policies using Evise system. For further questions and queries contact the corresponding Guest Editor Dr. Davide di Ruscio.
